

## At-a-Glance Health Team Strategy- July 2021

\*All data is based on cases per 100,000 residents. For our purposes we are looking at data for Hinds County. If at any point the MS Department of Health makes a relevant recommendation that will be followed, even if it is more stringent than what our strategy guides us to do. Up to date data can be found at [covidactnow.org](https://covidactnow.org). Our points are on a continuum since we can progress or regress at any time.
